# My Cat Tinkertwo!

By: Shay Argyres

I wanted a pet, so I asked my mom if we could go to the animal shelter? She said "I could get a cat and that we would start looking. About a week later when my mom and I were watching T.V., my mom said "I found a cat, my friend is giving away her cat because she does bead work and this cat likes to get into what she is making." "I will get you that cat for Christmas." My Mom said. Christmas was about a month away. I was so happy we were going to get a cat. That week my mom and I got everything together like food, toys, litter/box, brushes and more. Two weeks before Christmas my mom surprised me after school. When I went out to our car and I opened the car door there was our new cat.

Our Cat Tinkertwo is special to my family because she is funny and cute. My cat "Talks" to my family all the time. She has a toy called a "noodle" it is really a string but when she carries it in her mouth that is what it looks like. The other toy she likes are puff balls a.k.a. Craftballs. On the tile floor it looks like she plays soccer the way she katts them around. I think that it is funny that my cat drink running water a drinks out of a cup but not a bowl.

My Cat is very important to me because I am an only child and she is good company and fun to play with. She has brought a lot of joy and laughter to me

And my mom. We are  
always happy to see  
her when we get home,  
and she is happy to see  
us too. I love it when  
she lays with me and purrs,  
or when she runs really  
fast down the hall and flips  
to catch her puff ball. She  
is the best pet in the  
world!
